

AOL

Whitelisting Senders and Domains Using AOL Webmail

Please complete both of these methods to get our domain whitelisted for you.

1. Email me at webchair@nm-aa.org By emailing an address on the domain AOL should add it to your safe sends list.
2. Replying to an email from any Area 46 email address will automatically add the list as a safe sender if you're using AOL webmail. Email from that domain will then be delivered straight to your inbox. The software will recognize that it's not spam.
